

Price list for small optical cable traction machines

AI Overview

Small optical cable traction machines typically range from \$500 to \$5,000 depending on specifications, brand, and customization options. Overview of Pricing Small optical cable traction machines, also known as fiber optic cable tractors or pulling machines, are used for efficient cable laying in telecom, power, and traffic signal applications. Prices vary based on machine size, pulling capacity, automation features, and supplier location. Standard small models generally start around \$500–\$1,500, while more advanced or customized units can cost \$3,000–\$5,000. Supplier Options Alibaba offers a wide range of fiber cable traction machines with adjustable speed, overload protection, and remote control. Prices are often negotiable depending on order quantity and customization. Made-in-China lists optical fiber cable pulling machines with CE certification, OEM/ODM support, and lead times of 15–30 days for standard models and 30–45 days for customized units. Accio provides wholesale options with verified suppliers, allowing comparison of features and competitive pricing for small-scale operations. Europages features German and European manufacturers, which may offer higher-end machines with robust build quality and export support. Key Considerations Pulling Capacity: Ensure the machine can handle the diameter and length of the optical cable you plan to install. Automation & Safety: Features like automatic tension control, overload protection, and remote operation improve efficiency and reduce risk. Customization: Many suppliers offer adjustable bucket sizes, speed settings, and attachments tailored to specific cable types. Certifications: CE or ISO certifications ensure compliance with safety and quality standards. Shipping & Lead Time: Standard small machines typically ship within 2–4 weeks, while customized units may take longer. Recommendation For small-scale projects, consid...
