

Price list of galvanized cable trays in Argentina

AI Overview

The cost of galvanized cable trays in Argentina typically ranges from \$5 to \$25 USD per meter, with hot-dip galvanized trays costing 15–30% more than standard steel trays.

Price Overview The price of galvanized cable trays depends on several factors including material, type, size, coating, and supplier margins. Standard steel trays generally cost \$5–\$25 USD per meter, while hot-dip galvanized trays, which offer superior corrosion resistance, can add 15–30% to the base steel price. Ladder-type trays, commonly used for heavy cable loads, are at the higher end of this range, whereas perforated or wire mesh trays are usually cheaper.

Local Market Considerations In Argentina, pricing is influenced by raw material costs, particularly steel and aluminum, which fluctuate with global commodity markets. The exchange rate of the Argentine Peso against the US Dollar also significantly affects local prices, as many materials and imports are dollar-denominated. Domestic inflation and labor costs further contribute to variability, making it common for suppliers to adjust quotes frequently.

Installation and Additional Costs Installation costs vary by region and complexity. Skilled labor, equipment depreciation, and energy consumption for cutting, welding, and finishing can increase the total cost. For galvanized trays, the installation cost per meter may be higher due to the additional handling and protective coating requirements. Powder-coated or specialized trays for corrosive environments can further increase costs by 15–20%.

Practical Estimate For budgeting purposes in Argentina:

- Standard steel tray: \$5–\$25 USD per meter
- Hot-dip galvanized tray: \$6–\$32 USD per meter (including 15–30% premium)
- Aluminum tray: \$6–\$30 USD per meter
- Specialty coatings or powder-coated trays: add 15–20% to base price

Prices can vary depending on order volume, supplier, and project-specific requirements, s...
