

Price of 4-core single-mode fiber optic cross-section

AI Overview

The price of a 4-core single-mode fiber optic cable typically ranges from \$0.40 to \$1.80 per meter, depending on type, jacket, and installation environment. Pricing Overview The cost of a 4-core single-mode fiber optic cable varies based on several factors, including cable construction, jacket material, length, and additional features like armored protection or UV resistance . Basic indoor distribution cables with a PVC jacket generally start around \$0.40 per meter, while ruggedized outdoor or armored versions designed for harsh environments can reach \$1.80 per meter . A standard 100-meter reel of single-mode OS2 4-core cable typically costs \$60-\$90, depending on order volume and customization . Factors Affecting Price Cable Type: Single-mode (OS2) cables for long-distance transmission are more expensive than multimode variants . Jacket Material: Indoor PVC jackets are cheaper, while LSZH, armored, or direct burial jackets increase cost . Length and Bulk Orders: Longer reels or bulk purchases often qualify for tiered discounts, reducing per-meter cost . Quality and Standards: Cables meeting international standards like ITU-T G.652.D or ISO/IEC 11801 ensure better performance and durability, which can increase price . Typical Applications 4-core single-mode cables are ideal for backbone networks, campus networks, FTTH deployments, and medium-scale enterprise connections. The four cores allow for redundancy and duplex communication, supporting multiple services without laying additional cables . Summary For planning purposes, expect \$0.40-\$1.80 per meter for single-mode 4-core fiber optic cables, with 100-meter reels costing \$60-\$90. Prices increase for armored, outdoor, or specialized variants, and bulk orders can reduce costs. Always consider quality, certifications, and total cost of ownership to ensure reliable long-term performance .
