

Price of 96-core B2 optical cable

AI Overview

The price of a 96-core B2 optical cable typically ranges from \$1.50 to \$4.50 per meter, depending on specifications, manufacturer, and installation type.

Overview A 96-core fiber optic cable is designed for high-capacity data transmission in telecommunications, data centers, and enterprise networks. These cables can be single-mode or multi-mode, armored or gel-free, and suitable for outdoor or indoor applications. The B2 designation usually refers to a specific flame-retardant or low-smoke rating, which can slightly increase the cost compared to standard cables.

Factors Affecting Price

- Fiber Type:** Single-mode fibers (OS2) are generally more expensive than multi-mode fibers due to longer transmission distances and lower attenuation.
- Cable Construction:** Armored, gel-filled, or all-dielectric designs affect cost. Outdoor-rated cables with water-blocking features are typically higher priced.
- Length and Quantity:** Bulk orders reduce the per-meter cost, while short runs or custom lengths may increase it.
- Supplier and Region:** Prices vary by manufacturer and shipping location. Suppliers like CommScope, Necero, and American Tech Supply offer competitive pricing, but lead times and local availability can influence final cost.

Typical Price Range

- Per meter: \$1.50 – \$4.50
- Per 100 meters: \$150 – \$450
- Bulk orders (kilometer scale): Discounts may reduce the per-meter cost to below \$2 in some cases.

Recommendations Request a quote from multiple suppliers to get the most accurate pricing for your specific B2-rated 96-core cable. Specify cable type (single-mode vs multi-mode, armored vs gel-free, indoor vs outdoor) to ensure the quote matches your project requirements. Consider lead time and shipping costs, especially for large-scale deployments or international orders. By considering these factors, you can obtain a competitive and accurate price for a 96-core B2 optical cable suitable for your network infrastructure.
