

Price of Anti-Cut Optical Cable Terminal Box for Senegal Metro

AI Overview

The price of an Anti-Cut Optical Cable Terminal Box in Senegal typically ranges from \$50 to \$200 per unit, depending on capacity, material, and supplier.

Overview Anti-Cut Optical Cable Terminal Boxes are designed to protect fiber optic connections from tampering and environmental damage, making them suitable for metro and urban fiber networks. They are available in wall-mounted, aerial, and underground models, with capacities ranging from 12 to 576 fibers depending on the design and intended application.

Price Range Local Senegal suppliers: Optical fiber cable joint closures and terminal boxes are available through platforms like TradeKey Senegal and Lantekshop, with prices generally starting around \$50-\$100 for small-capacity boxes and up to \$150-\$200 for larger, high-capacity or waterproof models. International suppliers: Chinese manufacturers and exporters offer factory-priced terminal boxes with customization options, which can reduce costs for bulk orders. Prices vary based on material (ABS, PC), fiber capacity, and anti-cut features, typically in the \$60-\$180 range per unit.

Sourcing Tips Check local distributors like Lantekshop for immediate availability and delivery within Senegal. Request quotes from multiple suppliers to compare prices, especially if ordering in bulk for metro infrastructure. Verify specifications: Ensure the terminal box supports fusion splicing, mechanical splicing, and has anti-cut protection suitable for high-traffic urban environments. Consider shipping and import costs if sourcing internationally, as this can affect the final price.

Conclusion While exact pricing for the Senegal Metro project may require direct supplier quotes, you can expect unit prices between \$50 and \$200, with higher-end models offering enhanced security, waterproofing, and larger fiber capacity. Contacting verified local and international suppliers will provide the most accurate...
