

Price of Customized Fire Cable Trays between China and Europe

AI Overview

The price of customized fire-resistant cable trays from China to Europe varies widely depending on material, size, finish, and shipping terms, typically ranging from \$20 to \$150 per meter for standard industrial specifications, with additional costs for customization and freight.

Factors Affecting Price

Material and Finish Common materials include galvanized steel, stainless steel (304/316), aluminum, and FRP (fiberglass). Finishes such as hot-dip galvanized, powder-coated, pre-galvanized, or anodized affect durability and cost. Stainless steel trays are generally more expensive than GI or aluminum options.

Customization Prices depend on length, width, height, perforation type, and load capacity. Ladder-type, ventilated, or perforated trays with specific fireproof coatings may increase unit cost. Manufacturers often require exact specifications and quantity to provide a formal quotation.

Order Quantity Bulk orders reduce per-unit cost due to economies of scale. MOQ (minimum order quantity) varies by supplier, often starting from tens to hundreds of meters.

Shipping Terms Common international trade terms include EXW (Ex Works), FOB (Free on Board), CFR (Cost and Freight), and CIF (Cost, Insurance, Freight). Shipping costs from China to Europe depend on weight, volume, and port of delivery, typically adding \$5–\$20 per meter for standard shipments.

Lead Time and Inspection Production and delivery usually take 7–15 days for samples and 2–6 weeks for bulk orders, depending on customization. Third-party inspection is often available to ensure quality before shipment.

Estimated Price Range

Material/Finish	Price Range (per meter)
Standard GI or aluminum trays	\$20–\$50
Stainless steel 304/316 trays	\$60–\$150
FRP fire-retardant trays	\$40–\$100

Additional customization or coatings may increase the price by 10–30%.
