

Price of Direct-Connection Fiber Optic Junction Box

AI Overview

Direct-connection fiber optic junction boxes typically range from \$20 to \$100 per unit, depending on port capacity, materials, and features. Price Overview The cost of a fiber optic junction box depends on several factors, including the number of ports, core splicing capacity, material quality, and waterproof rating. For example, a 2-port, 12-core direct-connection FTTH junction box with IP65 waterproof rating and ABS/PC construction is commonly priced in the \$20–\$50 range for wholesale or small orders, while larger or more advanced models with additional ports, PLC splitters, or higher durability can reach \$80–\$100 or more per unit. Features Affecting Price Port and Core Capacity: Boxes supporting more cores (e.g., 12 or 24 cores) or multiple SC adapters generally cost more. Material and Durability: High-strength engineering plastics and IP65-rated waterproof designs increase reliability and price. Functionality: Integrated splicing, signal splitting, and cable management features add to the cost. Installation Type: Wall-mounted or outdoor-rated enclosures may be slightly more expensive than indoor-only models. Purchase Options Wholesale Platforms: Alibaba and Made-in-China offer competitive bulk pricing for fiber optic junction boxes, often with customization options. Industrial Suppliers: DirectIndustry lists products from brands like HUBER+SUHNER and METZ CONNECT, suitable for professional network installations. Retail Options: Amazon and specialized fiber optic stores provide smaller quantities for immediate purchase, though prices may vary by size and features. Recommendation For direct-connection FTTH applications, a 2-port, 12-core junction box with IP65 protection is a cost-effective choice for residential or commercial installations. When budgeting, consider shipping, warranty, and potential bulk discounts, as these can significantly affect the final cost.
