

Price of Network Patch Panels and Fiber Optic Trays

AI Overview

Fiber optic patch panels typically range from \$50 to \$500+ depending on size, port density, and pre-termination options, while fiber optic trays are often priced between \$20 and \$150.

Fiber Optic Patch Panels Patch panels are available in various configurations, including 1U, 2U, and 4U rack units, supporting up to 24 fibers per 1U for standard sliding tray panels. Prices vary based on:

- Port density:** Panels with higher port counts cost more. For example, 12-port panels are generally less expensive than 24-port or 48-port high-density panels.
- Type of fiber:** Singlemode panels are slightly more expensive than multimode panels due to performance specifications.
- Pre-terminated vs empty panels:** Pre-terminated panels with pigtails or adapter packs reduce installation time but increase cost.
- Brand and build quality:** Trusted brands like Excel, CommScope, and Connectix offer panels ranging from \$50-\$500+, depending on features and modularity. UK suppliers like The Networking Store and Cable Monkey offer next-day delivery and free shipping over certain amounts, which can affect total cost. RLH Industries provides a detailed price list for US customers and custom project quotes.

Fiber Optic Trays Fiber optic trays (or splice trays) are used for organizing and protecting fiber splices within panels. Pricing depends on:

- Tray size and capacity:** Small trays for 12-24 fibers cost around \$20-\$50, while larger trays for 48-72 fibers can reach \$100-\$150.
- Material and durability:** Mild steel or ABS trays with powder coating are more durable and slightly more expensive.
- Compatibility:** Trays designed for modular panels or specific brands may carry a premium.

Summary

- Low-density panels (12-24 ports): \$50-\$150
- High-density panels (48+ ports, modular): \$200-\$500+
- Fiber optic trays: \$20-\$150 depending on size and material
- Pre-terminated panels: Higher cost but faster installation, often \$150-\$500...
