

Price of South African Shaft Busbar Bridge

AI Overview

The price of a South African Shaft Busbar Bridge typically ranges from R350 to R1,400 excluding VAT, depending on material, size, and customization. Overview of Pricing Busbars in South Africa are available in copper, aluminium, and insulated variants, with prices varying based on current rating, dimensions, and surface treatment. For example, standard copper busbars are listed at R351.70 to R1,231.00 excluding VAT, with VAT-inclusive prices ranging from R404.46 to R1,415.65 . Aluminium busbars are generally lower in cost, while insulated or customized busbars may increase the price. Factors Affecting Cost Material: Copper busbars are more expensive than aluminium due to higher conductivity and durability . Current Rating: Higher amperage busbars require thicker or wider bars, increasing cost. Customization: Shaft busbar bridges may require precision cutting, bending, electroplating, or powder coating, which can add to the price . Supplier and Brand: Premium brands like Schneider Electric offer modular and insulated busbar systems, which may cost more but provide flexibility and safety features . How to Obtain an Exact Price Since a Shaft Busbar Bridge is a specialized component, the most accurate pricing comes from direct supplier quotes. Recommended suppliers in South Africa include: Liteglo - Offers a range of copper and aluminium busbars with online ordering . ACDC - Lists busbar prices and can provide custom solutions . Wenko Electrical - Customizes busbars to SABS standards with optional coatings . Schneider Electric South Africa - Provides modular and insulated busbar systems suitable for switchboards . Contacting these suppliers with your specifications (length, material, current rating, and insulation requirements) will yield the most accurate price for a Shaft Busbar Bridge.
