

Price of Trapezoidal Cable Tray Fixing Method

AI Overview

Trapezoidal cable tray fittings are typically priced per piece, with costs influenced by material, size, and coating, ranging from a few dollars to over \$50 per unit depending on specifications. Overview of Pricing Trapezoidal cable tray fittings, such as elbows, tees, reducers, and couplers, are sold individually, and their price depends on the material (galvanized steel, stainless steel, aluminum), coating (pre-galvanized, hot-dip galvanized, powder-coated, epoxy-coated), and dimensions (width, height, thickness) of the tray system. Standard lengths for trays are often 2.4 meters, and fittings are priced per unit. Hot-dip galvanized steel fittings are commonly used for both indoor and outdoor applications and are moderately priced. Stainless steel fittings are more expensive due to corrosion resistance and durability, suitable for chemical or coastal environments. Aluminum fittings are lightweight and corrosion-resistant, often priced between steel and stainless steel options. Typical Price Range While exact prices vary by supplier and region, trapezoidal cable tray fittings generally range from \$5 to \$50 per piece, depending on size and complexity. Simple straight couplers or clamps are at the lower end, while elbows, tees, and reducers for larger trays or specialized coatings are at the higher end. Factors Affecting Cost Material: Stainless steel > Aluminum > Galvanized steel. Coating: Hot-dip galvanized or epoxy-coated trays cost more than pre-galvanized or painted options. Size and Load Capacity: Wider and taller trays require larger fittings, increasing cost. Supplier and Customization: OEM or custom-fabricated fittings may have higher prices due to production and shipping. Suppliers and Sourcing Suppliers such as Shandong Hongfeng Import and Export Co., Ltd. and platforms like Go4WorldBusiness offer a wide range of trapezoidal cable trays and fittings, including customization op...
