

## Price of Waterproof Thickened Distribution Box

### AI Overview

Waterproof thickened distribution boxes typically range from \$15 to \$150 per unit, depending on size, material, and IP rating. Waterproof distribution boxes are designed to protect electrical components from moisture, dust, and environmental hazards, making them essential for outdoor, industrial, and commercial applications. Prices vary significantly based on material (ABS, polycarbonate, or stainless steel), size, IP rating (IP65–IP68), and whether the box includes features like DIN rails, pre-assembled terminals, or transparent covers. Typical Price Ranges Small plastic ABS or polycarbonate boxes (compact, IP65, basic protection) are usually priced around \$15–\$40 per unit. Medium to large plastic or DIN rail enclosures (HT series, extra internal space, IP65–IP66) range from \$40–\$80 per unit. Heavy-duty stainless steel or thickened metal boxes (IP66–IP68, corrosion-resistant, suitable for harsh environments) can cost \$80–\$150 or more, especially for custom or OEM orders.

**Factors Affecting Price**

- Material:** Stainless steel offers superior durability and corrosion resistance but is more expensive than polycarbonate or ABS.
- Size and Capacity:** Larger boxes with more terminals or DIN rail space cost more.
- IP Rating:** Higher protection levels (IP66–IP68) increase cost due to enhanced sealing and gaskets.
- Customization:** OEM branding, busbar modifications, or pre-assembled kits can raise the price.
- Supplier and Order Volume:** Bulk orders or wholesale purchases often reduce per-unit cost, while single-unit retail purchases may be higher.

**Buying Tips**

- Verify the IP rating to ensure adequate protection for your environment. For outdoor or washdown areas, IP65 or higher is recommended.
- Consider UV-stabilized plastics for sun-exposed installations to prevent yellowing or cracking.
- For harsh or corrosive environments, stainless steel boxes provide long-term reliability.
- Check if...
