

Price of cable tray 15075

AI Overview

The 15075 cable tray, typically a 150mm width by 75mm height galvanized steel tray, ranges from approximately \$2 to \$25 per meter depending on material, finish, and supplier. Price Overview The HUAYI XKCT-15075 galvanized metal steel cable tray is made from 1.5mm thick steel, designed for outdoor use with a maximum load of 500kg. While Alibaba lists this product with customizable options for bulk orders, the exact per-meter price varies based on quantity, shipping, and supplier negotiations. According to market analysis, cable tray prices per meter generally range from \$2 to \$25, influenced by material type, coating, and tray design. Galvanized steel is the most common and cost-effective for durability, while stainless steel and aluminum are more expensive due to corrosion resistance and lightweight properties. Factors Affecting Price Material: Galvanized steel is standard; stainless steel and aluminum cost more. Coating/Finish: Hot-dip galvanized (HDG) or powder-coated trays increase durability and price. Tray Type: Ladder trays are more expensive than perforated or wire mesh trays. Order Quantity: Bulk purchases can reduce per-meter cost. Shipping and Labor: Heavier trays incur higher transport costs, and installation labor varies by region. Regional Pricing Example In India, suppliers like M.G. Cable Industries provide coupler plates for 75/100mm height trays at around ₹30 per piece, indicating that local pricing for the full tray may vary depending on height, length, and additional hardware. Recommendation For accurate pricing, it is advisable to request a quote from suppliers specifying the tray dimensions, material, finish, and quantity. Bulk orders often yield significant cost savings, and considering shipping and installation costs is essential for budgeting.
