

Price of concealed wiring distribution boxes

AI Overview

The cost of complete concealed wiring for distribution boxes typically ranges from \$3 to \$8 per square foot, depending on materials, labor, and type of distribution box used.

Factors Affecting Cost

- Type of Distribution Box:** Plastic, metal, or waterproof boxes vary in price. Plastic boxes are more affordable, while metal or waterproof boxes for industrial or outdoor use are more expensive.
- Wiring Material:** Copper wires are standard for concealed wiring due to durability and conductivity, while aluminum wires are cheaper but less common.
- Conduits:** PVC or metal conduits are used to hide and protect wires. Metal conduits are stronger and costlier, while PVC is economical.
- Labor Charges:** Skilled electricians charge based on the complexity of the layout, number of circuits, and installation time. Concealed wiring requires wall cutting, conduit placement, and plastering, which increases labor costs.
- Project Size:** Larger homes or commercial spaces require more wiring, conduits, and distribution boxes, increasing the total cost.

Typical Cost Breakdown

- Plastic Distribution Box: \$10–\$30 per unit
- Metal Distribution Box: \$25–\$60 per unit
- Concealed Wiring (including conduits and labor): \$3–\$8 per square foot
- Additional Accessories: Switches, sockets, and connectors may add \$50–\$200 depending on the number and quality.

Installation Considerations

- Ensure a wiring layout plan is prepared to avoid short circuits and ensure proper placement of distribution boxes.
- Use earthing and safety measures to prevent electrical hazards, especially with metal boxes.
- For high-demand or industrial setups, consider ventilated or waterproof distribution boxes to handle heat and moisture.

In summary, for a standard residential concealed wiring project with 2–3 distribution boxes, the total cost can range from \$500 to \$1,500, depending on materials, labor, and project complexity. For larger or industrial installations, costs...
