

Price of finished cable tray bends for climbing slopes

AI Overview

Finished cable tray bends for climbing slopes typically range from \$20 to \$150 per piece, depending on material, size, and angle. Factors Affecting Price

Material: Steel (carbon or galvanized) is generally less expensive than aluminum or stainless steel. Fiberglass (FRP/GRP) bends are usually higher priced due to corrosion resistance.

Bend Type and Angle: Vertical bends (inside or outside) and adjustable bends for slopes can cost more than standard 90° horizontal bends.

Dimensions: Width, height, and radius of the bend affect the price. Larger trays with higher cable capacity are more expensive.

Finish and Coating: Electroplated zinc, powder-coated, or pre-galvanized finishes add to the cost.

Supplier and Location: Prices vary by region and supplier. In India, suppliers list cable tray bends with competitive pricing, while in the US, specialized kits like adjustable vertical bends may be priced higher due to shipping and certification.

Typical Price Ranges

- Small horizontal bends (4-12 inches width): \$20-\$50 per piece
- Standard vertical bends (12-24 inches width, pre-galvanized steel or aluminum): \$50-\$100 per piece
- Adjustable vertical bend kits (up to 180°): \$100-\$150 per kit, often including hardware
- Specialty materials (stainless steel, FRP/GRP): \$120-\$200 per piece depending on size and corrosion resistance

Recommendations

For budget planning, consider the material and bend type first, as these have the largest impact on cost. Adjustable kits are ideal for climbing slopes where precise angles are required. Contact local suppliers for exact quotes, as bulk orders or project-specific dimensions can significantly affect pricing. By considering these factors, you can estimate the cost of cable tray bends for climbing slopes and select the appropriate type for your installation.
