

Price of right-angle cable tray fittings

AI Overview

Right angle cable tray brackets are available starting at approximately \$0.60 per unit. Right angle cable tray brackets are typically made of galvanized metal and are designed to connect two cable trays at a 90° angle, supporting efficient cable management in industrial and commercial installations. They are CE certified and comply with standards such as DIN 4102-12:1998, ISO 14001:2015, and ISO 45001:2018, ensuring fire resistance and quality. Installation usually involves securing the trays with screws at the connection points. Pricing can vary depending on size, material, and supplier. For example, high-quality galvanized brackets are available for around \$0.60 per unit with no minimum order requirement, making them suitable for both wholesale and individual purchases. Suppliers like RS, McMaster-Carr, and Direct Channel offer a range of cable tray brackets, including stand-off, G hanger, and trapeze support brackets, with prices influenced by dimensions and finish (pre-galvanized, hot-dipped galvanized, or stainless steel). When budgeting, consider the tray width compatibility (e.g., 60x100 mm, 60x150 mm, 60x200 mm) and the load requirements, as heavy-duty brackets may cost more but provide greater support and durability. For bulk orders or specific project requirements, contacting suppliers directly can provide custom pricing and delivery options.
