

# Price quote for fireproof metal sealed cable trays

## More durable and robust

The outer layer is made of environmentally friendly PVC, which is soft and elastic. It can be stretched without damage, so you can use it with confidence.

## AI Overview

The price of metal sealed fire-resistant cable trays varies widely depending on material, fire rating, size, and supplier, typically ranging from \$50 to \$200 per meter for industrial-grade options.

**Factors Affecting Price**

**Material and Construction:** Metal sealed fire-resistant trays are commonly made from galvanized steel, stainless steel, or aluminum, often with powder-coated or intumescent fire-resistant coatings. Galvanized steel is strong and cost-effective, stainless steel offers corrosion resistance, and aluminum is lightweight but may be more expensive.

**Fire Rating:** Trays are rated for fire resistance, often 60, 90, or 120 minutes, with higher ratings increasing cost. Some premium trays, like those with WS5X classification, can withstand up to 1050°C for 2 hours, which adds to the price.

**Size and Load Capacity:** Standard lengths are usually 3 meters, with widths around 150mm and load ratings of 10kg/m on a 1.65-meter span. Larger or reinforced trays for heavy-duty applications cost more.

**Surface Treatment:** Options include electrostatic powder coating, electro-galvanizing, hot-dip galvanizing, and anodizing, which affect durability and price.

**Supplier and Customization:** Prices vary by supplier, order quantity, and customization. Suppliers with verified certifications, long industry experience, and high-quality production lines may charge a premium.

**Typical Price Range**

- Standard industrial metal trays: \$50–\$100 per meter
- High fire-rated or heavy-duty trays: \$120–\$200 per meter
- Custom or specialized finishes: Prices may exceed \$200 per meter depending on specifications and shipping.

**Additional Considerations**

- Ensure compliance with UL, BS, IEC, ISO 834-1, EN 1363-1, DIN 4102-12, or AS/NZS 3013:2005 standards.
- Consider low smoke, halogen-free (LSZH) coatings for enclosed public spaces or data centers.
- Verify supplier reliability, production capacity, and lead times.
