

Prices of professional galvanized cable trays in Sweden

AI Overview

Galvanized cable trays in Sweden typically cost between 500 and 1,500 SEK per meter, depending on type, size, and supplier. Price Overview The cost of galvanized cable trays varies based on tray type, length, and material quality. Standard ladder-type galvanized trays with a length of 2.4–3 meters generally fall in the range of 500–1,500 SEK per meter, with hot-dip galvanized options at the higher end due to enhanced corrosion resistance. Wire mesh trays are often more affordable and easier to install, making them a cost-effective choice for many projects. Factors Affecting Cost Material and Coating: Hot-dip galvanization or zinc-magnesium alloy coatings increase durability and price. Tray Type: Ladder, perforated, or solid-bottom trays have different manufacturing costs. Ladder trays are common for industrial and commercial installations. Length and Width: Longer or wider trays require more material, increasing cost. Standard lengths are 2.4–3 meters, with some suppliers offering 6-meter options. Accessories and Fittings: Elbows, tees, and mounting brackets are priced per piece and can add to the total project cost. Supplier and Brand: Prices vary between local suppliers like Ahlsell and international exporters such as Brilltech Engineers. Additional Considerations Installation Costs: Galvanized trays are generally easy to install, which can reduce labor costs. Durability: Galvanized trays are long-lasting and require minimal maintenance, which can offset higher upfront costs. Environmental Suitability: Choose trays according to environmental class (C2–C4) to ensure longevity in industrial, coastal, or chemical-heavy areas. For precise pricing, it is recommended to request a quote from local suppliers such as Ahlsell or Brilltech Engineers, specifying the tray type, length, and any required fittings. This ensures accurate cost estimates tailored to your project...
