

Quotation for 98-core optical cable laying

AI Overview

Estimated cost for laying a 98-core optical fiber cable ranges from \$1.50 to \$3.50 per foot, depending on cable type, installation complexity, and site conditions.

Cable Material Costs A 98-core single-mode fiber optic cable typically falls between \$0.50 and \$1.50 per foot for the cable itself, depending on whether it is armored, outdoor-rated, or plenum-rated for indoor use. Higher strand counts increase the cost proportionally, and pre-terminated assemblies or specialized connectors may add additional expenses.

Installation and Labor Labor is a significant component of the total cost. For trenching, conduit placement, and cable laying, typical rates range from \$0.60 to \$3.00 per foot, depending on terrain, accessibility, and precision required for splicing and termination. Horizontal Directional Drilling (HDD) is preferred where feasible, otherwise standard trenching at a depth of approximately 1.65 meters with a trench width of 250–300 mm is recommended. Protective DWC pipes should be used in areas with underground utilities or soft soil.

Additional Costs

- Splicing and Termination:** Fusion splicing and connectorization require skilled labor and specialized tools, adding to the cost.
- Conduit and Protective Works:** For outdoor installations, conduit, warning tapes, and mounting hardware are necessary.
- Permits and Delivery:** Local permits, delivery, and disposal costs vary by region and can add 5–15% to the total project cost.
- Accessories:** Patch panels, adapters, and testing equipment may add \$100–\$500 depending on project scale.

Sample Cost Estimate For a 1,000-foot outdoor 98-core single-mode cable run with standard trenching and 4 terminations:

- Cable: \$0.90/ft → \$900
- Labor: \$1.50/ft → \$1,500
- Conduit & protective works: \$300
- Permits & delivery: \$200
- Accessories & testing: \$200
- Total Estimated Cost: \$3,100**

For longer runs, armored cables, or complex urban installations, costs can rise to \$3,500–\$5,000 per 1,000 feet due to additional labor, splicing, and protective measures.
