

Raw materials for distribution boxes and cabinets

Overview

You can find distribution boxes made from various distribution box materials such as steel, aluminum, PVC, polycarbonate, high-density polyethylene, and thermoset plastics like SMC. Each distribution box material has its own special strengths. Same day shipping for cardboard boxes, plastic bags, janitorial, retail and shipping supplies. How to select the raw materials of distribution box with good cost performance is the first consideration of component enterprises. Most enterprises pay more attention to whether the manufacturer's products have passed relevant international certification when selecting explosion-proof junction. At E-abel, we combine advanced production equipment, strict quality control, and international certification standards to provide high-performance distribution boxes tailored for global markets. This article walks you through the complete distribution box manufacturing process, covering each step. The groove contours of electronic distribution boxes and the very narrow grooves of micro-distribution housings are seamlessly sealed with the sealing foams of the polyurethane-based FERMAPOR K31 or the silicone-based FERMASIL product families.
