

Single-mode loopback fiber

MTP MPO SC-Type Fiber Adapter

Overview

High-quality single mode LC loopback adapter for fiber optic testing or network restorations. The LC fiber Loopback is also known as an LC fiber loopback plug or loopback adapter. It is typically used for fiber optic testing applications, network restorations, and troubleshooting. MTP® Loopbacks are primarily used in testing by supplying a looped signal that tests both transmit and receive functions within fiber optic applications, more specifically parallel optics 40/100G networks. The development of fiber optic loopback components has greatly improved testing practices. SC Duplex PVC Single-mode Fiber Loopback Module Fiber Loopback Module is designed to provide a media of return patch for a fibre optic signal. By directly linking the transmit (Tx) and receive (Rx) ports, they enable technicians to verify signal integrity and device functionality with ease. Devices allow verification and testing of transceivers featuring MTP® interface – 40G PLR4 or 100G PSM4 devices. With low insertion loss, high return loss, and a compact.
