

Single-mode two-core G 657a drop fiber

Overview

Self-supporting FTTH drop cable is constructed with one or two single-mode fiber (G. The cable is protected by a dielectric strength member made of fiberglass reinforced plastic (FRP), steel wire and a LSZH outer jacket. "Leviton is dedicated to designing, developing and manufacturing sustainable high performance structured cabling and specialty cabling solutions. " The information contained in this document is valid and correct at the time of issue. Leviton reserves the right to modify details without notice in. The 1-2 Core Aerial Self-Support FTTH Drop Cable (GJYXFCH) is a high-quality FTTH (Fiber to the Home) solution designed for reliable and efficient aerial fiber optic installations. Single-mode fiber has only one mode of transmission. This is done by means of two categories of single-mode fibres, one of which, category A, is fully. High-quality SC singlemode I-V (ZN)H FTTH distribution cable (one side equipped with connectors, open side comes with pulling aid and bend-optimized) for universal indoor and outdoor application, including installation between buildings in ducts and inside buildings up to riser ducts.
