

South African DAC High-Speed Cable SFP

Overview

This high-speed, reliable cable is perfect for connecting your devices for seamless data transfer. Say goodbye to slow connections and hello to smooth, efficient networking with the 10G SFP+ DAC 3M. DAC (Direct Attach Copper) cables are designed to provide low latency and high-bandwidth operation in short-distance connections without the use of external optical transceivers. This 3-meter cable utilizes high-purity copper to ensure stable performance over short distances, reducing latency and signal loss in enterprise and data. SFP (Small Form-Factor Pluggable) cables and transceivers provide versatile connectivity between network devices. Designed for both copper and fiber links, they support modern high-speed data infrastructure - from short rack-level. Shop DAC Cables online in South Africa.
