

Switch with 8 Ethernet ports and 8 fiber optic ports

AI Overview

The Moxa EDS-4008 Series and Axis D8308 Fiber Aggregation Switch are suitable options for 8 Ethernet ports combined with fiber optic connectivity. Moxa EDS-4008 Series The EDS-4008 Series offers 8-port managed Fast Ethernet switches with options for four 1 Gbps uplink ports or two 100M fiber-optic ports, depending on the model. Some variants include PoE/PoE+/PoE++ support for powering high-bandwidth devices. These switches are designed for industrial applications such as video monitoring, ITS, and DCS systems. They feature redundant Ethernet technologies like Turbo Ring, Turbo Chain, and RSTP/STP to enhance network reliability. The series also complies with IEC 62443-4-2 security standards, making it suitable for secure industrial networks.

Axis D8308 Fiber Aggregation Switch The Axis D8308 is a fiber aggregation switch equipped with eight SFP+ ports, two SFP28 ports, and an RJ45 console port for configuration. It is ideal for long-distance fiber connections and linking remote network locations. The switch supports advanced network features such as VLAN, QoS, Port Security, and Spanning Tree, and includes an integrated DHCP server for automatic IP assignment. It is easy to install using Axis tools like AXIS IP Utility and AXIS Device Manager, making it suitable for both enterprise and industrial deployments.

Additional Options Other manufacturers, such as Versitron, offer a wide range of fiber optic network switches with flexible port configurations, including managed and unmanaged models, industrial and commercial grades, and PoE support. These switches can handle 10Base, 100Base, 1000Base, and 10 Gigabit networks, providing seamless Ethernet-to-fiber conversion.

Key Considerations When selecting a switch with 8 Ethernet and 4 fiber ports, consider: Port speed: Ensure fiber ports support the required bandwidth (1G, 10G, or higher). PoE requirements: If pow...
