

There is an electrical distribution box on the side of the building

Overview

The box located on the side of a house, often made of metal or heavy plastic, is the primary electrical service entrance equipment. This assembly is the gateway where the utility's power grid connects to the home's internal wiring system. It manages the high-voltage connection, measures energy. Bottom Line Up Front: Your home's distribution box (electrical panel) is typically located in the basement, garage, utility room, or mounted outside near your electrical meter. To find it quickly, look for a rectangular gray metal box about the size of a medicine cabinet, often positioned close to. The article provides an overview of residential electrical service components, including how power enters a home through service drop or lateral, and is managed through the service meter, main disconnect, and service panel. Christian Delbert / Shutterstock. You can find electric panels inside cabinets, behind refrigerators, or inside clothes closets in older homes.
