

Three-in-one optical fiber distribution box 144

Overview

Broadstick provides Optical compliant with TIA 568-C. This ODF has been designed for racks of 19" and supports up to 144 fibers in SC and 288 fibers in SL. All Broadstick panels and cassettes provide a precise fiber connection and it complies with the Industry standard. A 144 fiber distribution box is a critical component in modern fiber optic networks, designed to manage, protect, and distribute optical fibers efficiently. These enclosures are categorized based on their deployment environment, installation method, and functional requirements. With the capacity to. The use of high-quality cold-rolled steel plate, electrostatic spray plastic on the surface, has good corrosion resistance 2. We no longer actively offer this product. FTTH Box comply with salt spray test, crush test and temperature cycling under international standard.
