

Two fiber optic patch panel

Overview

This Fiber patch panel is designed to offer an easy to use and easy to access solution for fiber patching and fiber optic splicing. It acts as a hub for organizing splices and patch cords, streamlining fiber management and preserving signal integrity. If you're considering purchasing one for your organization, here's what you need to know: What is it?

A fiber optic patch panel serves as the critical interface. With the growth of the fiber industry, a wide array of fiber optic patch panels have been developed to fit the many needs of these varying environments. If you already know what your project requires, check out our complete Fiber Patch Panel selection. Our 19-inch rack-mount panels are constructed from .06 cold-rolled steel with durable black powder coat. UHDX ultra high-density fiber patch panels patch up to 144 LC fibers per RU to provide an inter-connect or cross-connect between backbone horizontal cable and active equipment while minimizing rack space in a frame or cabinet.
