

Ukraine CIF price guaranteed polarization fiber OS2

AI Overview

The CIF price for OS2 fiber in Ukraine in 2026 is currently influenced by high demand and supply constraints, with typical single-mode OS2 fiber ranging from \$210-\$230 per core kilometer, though polarization-maintaining variants may command a premium.

Current Market Context Ukraine has become a significant consumer of optical fiber due to rebuilding telecommunications infrastructure and defense applications, including fiber-optic drone systems. This has placed substantial pressure on global fiber supply, particularly for single-mode OS2 fibers, which are widely used in long-distance and high-speed networks.

Pricing Overview Standard OS2 Fiber: Prices for standard G657A2/OS2 fiber have surged from approximately \$35 to \$210-\$230 per core kilometer due to high local demand.

Import/Export Trends: In 2025, the average import price of optical fiber in Ukraine was around \$85,321 per ton, while export prices reached \$161,800 per ton, reflecting strong market growth and regional supply variations.

Polarization-Maintaining OS2 Fiber: These specialized fibers, which preserve the polarization of light for applications like coherent communications or sensing, typically cost 20-50% more than standard OS2 fiber, depending on manufacturer, core diameter, and delivery terms. Exact CIF pricing will vary based on quantity, supplier, and shipping logistics.

Suppliers and Availability Local suppliers such as NanoConnect and manufacturers like Odeskabel offer OS2 fibers with durable LSZH jackets suitable for outdoor and indoor installations. International distributors like Mouser Electronics also provide OS2 fiber, though CIF pricing to Ukraine will include shipping, insurance, and customs duties.

Factors Affecting CIF Pricing High Local Demand: Ukraine's accelerated fiber deployment and defense applications increase competition for limited stock. Global...
