

Uzbekistan Low Voltage Complete Equipment Company

AI Overview

Low-voltage complete devices (LVCDs) in Uzbekistan are used for power distribution, control, and protection in industrial and commercial electrical systems, with multiple certified local suppliers and regulatory compliance requirements.

Overview of Low-Voltage Complete Devices (LVCDs)

Low-voltage complete devices are designed for receiving and distributing three-phase alternating current at 0.4 kV and 0.69 kV, with a frequency of 50 Hz, in networks with either solidly grounded or isolated neutral systems. They are used to control electrical equipment and protect it from short-circuit and overload currents. LVCDs serve as distribution panels, power distribution points, control and automation panels, and cabinets, and can also be installed on the low-voltage side of package transformer substations.

Key Suppliers in Uzbekistan

Several companies provide low-voltage equipment in Uzbekistan:

- ENERGOREMONT** – Produces industrial low- and medium-voltage equipment in Tashkent since 1992.
- ELITE POWER SYSTEM LTD** – Manufactures transformers, circuit breakers, modular transformer substations, and both high- and low-voltage equipment, along with repair and installation services.
- GIGA ENERGY MAX LTD** – Produces transformers, transformer substations, and low-voltage equipment in Tashkent.
- JV Aysel Energy LLC** – Offers a complete production cycle from design to delivery, supplying low- and high-voltage distribution and control equipment for industries such as metallurgy, transport, oil and gas, and housing.
- POWER ENERGY SYSTEM** – Supplies certified LVCDs with fast delivery across Uzbekistan.

Other notable suppliers include **ENERGOPRIBOR LTD**, **BANIMAX METALL LEADER LTD**, and **CHAGDASH POWER SYSTEMS JV LTD**.
