

What is the price of angle iron for cable trays

AI Overview

The price of angle iron for cable trays typically starts around US\$10 per piece, depending on size, material, and supplier. Angle iron for cable trays is commonly made from galvanized steel, aluminum, or stainless steel, providing structural support for cable management systems in industrial, commercial, and data center applications. Prices vary based on dimensions, thickness, and finish, as well as whether the angle is perforated or solid. For example, standard 90° galvanized steel angles for connecting cable trays can range from \$10 to \$20 per piece, while longer or specialized angles may cost more. Suppliers often sell angle iron in pre-cut lengths or kits, such as 10-piece sets or 20-foot channels, which can affect the unit price. Additional factors influencing cost include certifications (CE, ISO, fire resistance) and customization for specific cable tray systems. For budgeting purposes, it is recommended to request quotes from multiple suppliers and consider shipping costs, especially for bulk orders or international purchases. Online marketplaces like Made-in-China, Alibaba, and specialized distributors provide a range of options with sample pricing available for reference.
