

Where can I buy a Bulgarian optical splitter

AI Overview

You can purchase optical splitters from Titoptic Ltd, a Bulgarian manufacturer specializing in precision optical components. Bulgarian Supplier Titoptic Ltd, based in Sofia, Bulgaria, manufactures and supplies precision optical components, including optical splitters, for optomechanical and optoelectronic devices. They offer: Custom production according to ISO10110, ISO1101, DIN3140, and MIL-O13830 standards. Various coatings: anti-reflection, aluminum, silver, high-reflection dielectric, neutral density, and dichroic filters. High surface accuracy (up to $L/20$) and a wide selection of Schott glass types. Export to Europe, the Middle East, and the USA. You can contact Titoptic directly through their website titoptic.com to inquire about availability, specifications, and pricing.

International Options If you are open to international suppliers, several companies provide optical splitters that can be shipped to Bulgaria: RP Photonics offers a wide range of beam splitters, including cube and plate types, with various splitting ratios and coatings suitable for laser systems, microscopy, and interferometry. Fiber24 provides fiber optic splitters (PLC and single-mode) in ratios from 1:2 to 1:64, suitable for FTTH, data centers, and industrial applications. Amazon and other online marketplaces also list optical splitters for general use, though these are typically for consumer or small-scale applications.

Considerations When Buying Type of splitter: Decide between fiber optic, planar lightwave circuit (PLC), or free-space beam splitters. Splitting ratio: Common ratios include 50:50, 30:70, or custom ratios depending on your application. Coatings and wavelength range: Ensure the splitter matches your laser or optical system's wavelength and power requirements. Customization: Bulgarian suppliers like Titoptic can provide custom specifications, which may be advantageous for research or indu...
