

Which company offers the best fiber optic cable for Angola

AI Overview

TV Cabo, Net One, Angola Cables, and Anglobal are among the top providers of fiber optic services in Angola, each excelling in different segments from residential to enterprise and international connectivity.

Residential Fiber Optic Providers TV Cabo is the largest FTTH (Fiber-to-the-Home) provider in Luanda, targeting higher-income residential areas such as Maianga, Ingombotas, Maculusso, Alvalade, Talatona, and Kilamba Kiayi. It offers triple-play bundles (internet, TV, and voice) with speeds ranging from 50 Mbps to 300 Mbps, making it a strong choice for households seeking reliable high-speed internet. Net One focuses on premium residential areas like Talatona and Luanda Sul, offering speeds up to 500 Mbps. Its services are tailored for expatriates and high-income Angolans, providing robust performance for demanding users. Mercury Telecom and Multitel primarily serve enterprise clients, but their fiber networks in commercial buildings and business districts can indirectly support residential expansion in adjacent areas.

Enterprise and Backbone Connectivity Angola Cables operates Angola's primary submarine fiber optic systems, including the South Atlantic Cable System (SACS) and the West Africa Cable System (WACS). These provide high-capacity international bandwidth with low latency, connecting Angola to the Americas, Europe, and Africa. Angola Cables is ideal for businesses and ISPs requiring reliable international connectivity. Anglobal specializes in the construction, installation, and maintenance of fiber optic networks across Angola. With over 2,000 km of backbone and access networks built, Anglobal provides turnkey solutions for both enterprise and residential deployments, ensuring high-quality fiber infrastructure.
