

Wholesale Price List for Multi-core Optical Cables

AI Overview

Multi-core optical cables are available wholesale starting around \$0.05 per unit, with prices varying based on core count, type, and supplier. Pricing Overview Wholesale prices for multi-core optical cables depend on core count, fiber type, and order volume. For example, multi-core fiber optic cables with 12-48 cores in ADSS and singlemode/multimode configurations are available starting at approximately \$0.05 per unit for bulk orders of 10 units or more, suitable for FTTH and outdoor applications (Alibaba) . Prices can increase with higher core counts, specialized outdoor designs, or OEM customization options (Made-in-China) . Supplier Options Alibaba: Offers a wide range of multi-core fiber optic cables from verified international suppliers, including waterproof and outdoor-ready designs, with bulk purchase options and flexible minimum order quantities . Made-in-China: Provides direct factory OEM distributors, allowing buyers to negotiate prices, customize specifications, and access competitive wholesale rates for large-scale projects . CableWholesale: Supplies singlemode and multimode fiber optic cables in bulk, with discounts for large orders and additional accessories like connectors and converters . Key Considerations Core Count: More cores generally increase the price per unit. Fiber Type: Singlemode cables are typically more expensive than multimode due to longer-distance performance. Customization: OEM or ODM orders allow specification of cable length, jacket type, and performance metrics, which can affect pricing. Order Volume: Bulk purchases often reduce the per-unit cost significantly. For precise pricing, it is recommended to contact suppliers directly to request a tailored quote based on your required core count, fiber type, and order volume. This ensures the most accurate and competitive wholesale pricing for your project.
