

Wholesale Price of Explosion-Proof Fiber Optic Cable for Smart Buildings

AI Overview

Explosion-proof fiber optic cables for smart buildings typically range from around \$9 per meter, with prices varying based on customization, core count, and certifications.

Pricing Overview
Per-Meter Cost: Some suppliers offer explosion-proof fiber optic cables at approximately \$9 per meter for sample orders, with bulk pricing likely lower depending on order volume and customization.

Minimum Order Quantities: Wholesale orders often require a minimum of 3 to 6 rolls for customized options such as logos, packaging, or graphic designs.

Customization Impact: Prices can increase if you require specific core counts, flame-retardant sheathing, or specialized armoring suitable for industrial or hazardous environments.

Product Specifications
Core and Fiber Type: Options include single-mode or multimode fibers, with core diameters ranging from 200µm for highly flexible designs to standard sizes for long-distance transmission.

Construction: Explosion-proof cables often feature quartz glass cores with hard plastic resin cladding, providing thermal stability, high noise immunity, and suitability for harsh industrial environments.

Certifications: Many suppliers provide RoHS compliance, flame-retardant ratings, and other safety certifications, which are critical for smart building installations.

Applications in Smart Buildings
Indoor and Outdoor Use: These cables are suitable for fixed wiring inside equipment, plant operations, and vehicle-mounted systems where high-speed, reliable data transmission is required.

Explosion-Proof Environments: Ideal for hazardous areas, such as chemical plants or industrial zones integrated into smart building networks, ensuring safety and compliance with fire and explosion standards.

Supplier Considerations
Global Export: Some manufacturers export to regions including the Philippines, Nigeria, and Singapore, and offer full customization services.
